**Ellen V. Katz**

4575 Hillwood Dr., Shingle Springs, CA 95682

Caltrans is saying that 9,000 cars a day will not impact the rural aspect of Shingle Springs? That's unbelievable. The congestion & emissions from those cars will cause excessive air quality that will cause more health hazards for the area.

### Response:

The commenter believes the Interchange Project will have significant traffic and air quality impacts. Both the 2002 Final EIR and the Supplemental EIR analyze the potential air quality impacts of the Interchange Project and conclude that those impacts would be less-than-significant. 2002 Final EIR at Section 5.5; Supplemental EIR at Section 5.5. The 2002 Final EIR also analyzes the potential traffic impacts of the Interchange Project and concludes that those impacts would be less-than-significant. 2002 Final EIR at Section 5.4.
